Introduction to getlinked Tech Hackathon 1.0

Our tech hackathon is a melting pot of visionaries, and its purpose is as clear as day: to shape the future. Whether you're a coding genius, a design maverick, or a concept wizard, you'll have the chance to transform your ideas into reality. Solving real-world problems, pushing the boundaries of technology, and creating solutions that can change the world, that's what we're all about!

Rules and Guidelines

Our tech hackathon is a melting pot of visionaries, and its purpose is as clear as day: to shape the future. Whether you're a coding genius, a design maverick, or a concept wizard, you'll have the chance to transform your ideas into reality. Solving real-world problems, pushing the boundaries of technology, and creating solutions that can change the world, that's what we're all about!

Judging Criteria Key attributes

Innovation and Creativity: Evaluate the uniqueness and creativity of the solution. Consider whether it addresses a real-world problem in a novel way or introduces innovative features.

Functionality: Assess how well the solution works. Does it perform its intended functions effectively and without major issues? Judges would consider the completeness and robustness of the solution.

Impact and Relevance: Determine the potential impact of the solution in the real world. Does it address a significant problem, and is it relevant to the target audience? Judges would assess the potential social, economic, or environmental benefits.

Technical Complexity: Evaluate the technical sophistication of the solution. Judges would consider the complexity of the code, the use of advanced technologies or algorithms, and the scalability of the solution.

Adherence to Hackathon Rules: Judges will ensure that the team adhered to the rules and guidelines of the hackathon, including deadlines, use of specific technologies or APIs, and any other competition-specific requirements.
